The chatbot trap: confident answers without accountability

Black-box matches leave users unable to inspect the reasoning.

Hallucinated courses can send people toward nonexistent options.

False certainty hides how uncertain future job trends really are.

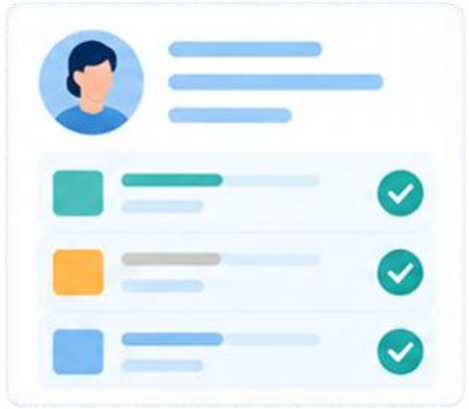

Seven modules, one explainable journey

1. Review CV evidence and let the user verify detected skills.

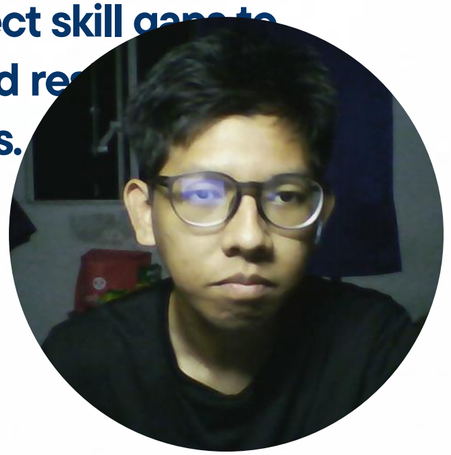

2. Map future job trends and disrupton scenarios.

3. Explain role matches with transparent reasoning.

4. Connect skill gaps to grounded re pathways.

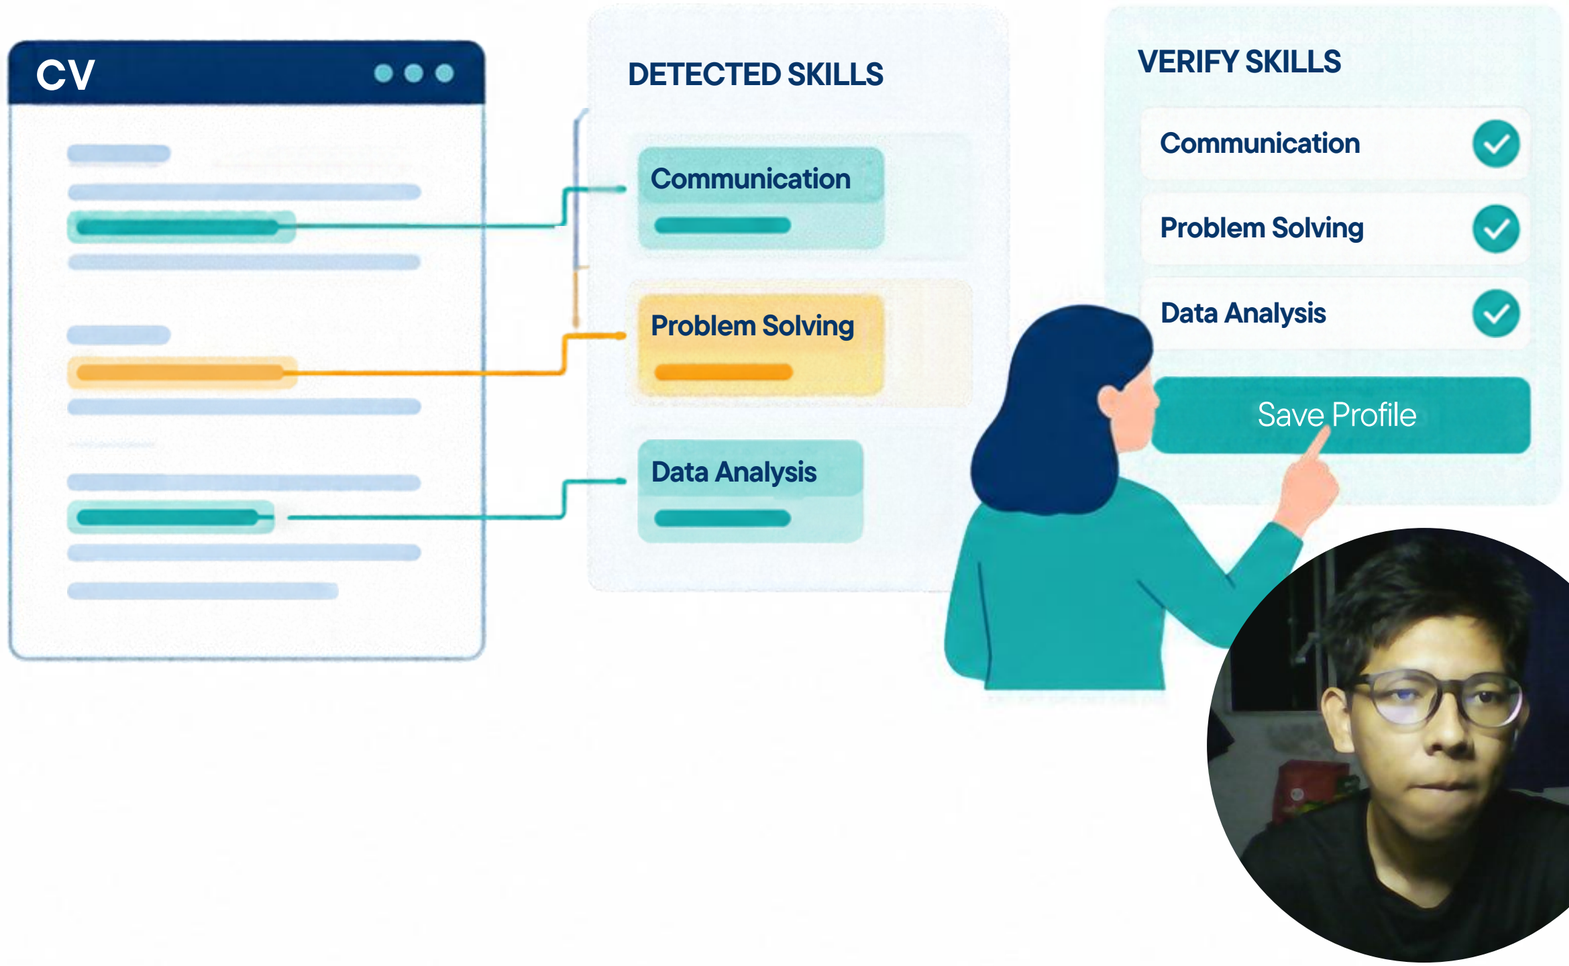

Skills are supported by evidence, not guesswork

Each detected skill points to an exact CV line or excerpt.

Users review and verify skills before a profile is saved.

Human-in-the-loop validation keeps the user in control.

Three futures, not one false forecast

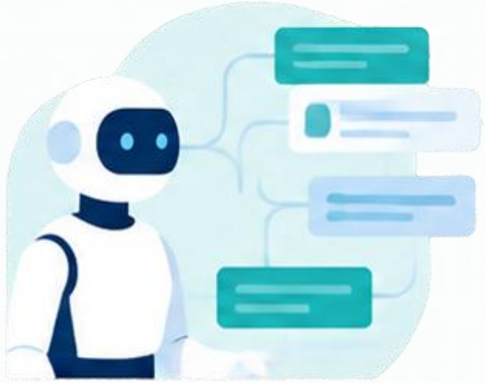

BASELINE

Historical automation pace

MODERATE

Accelerated AI tooling and co-pilot augmentation

FAST

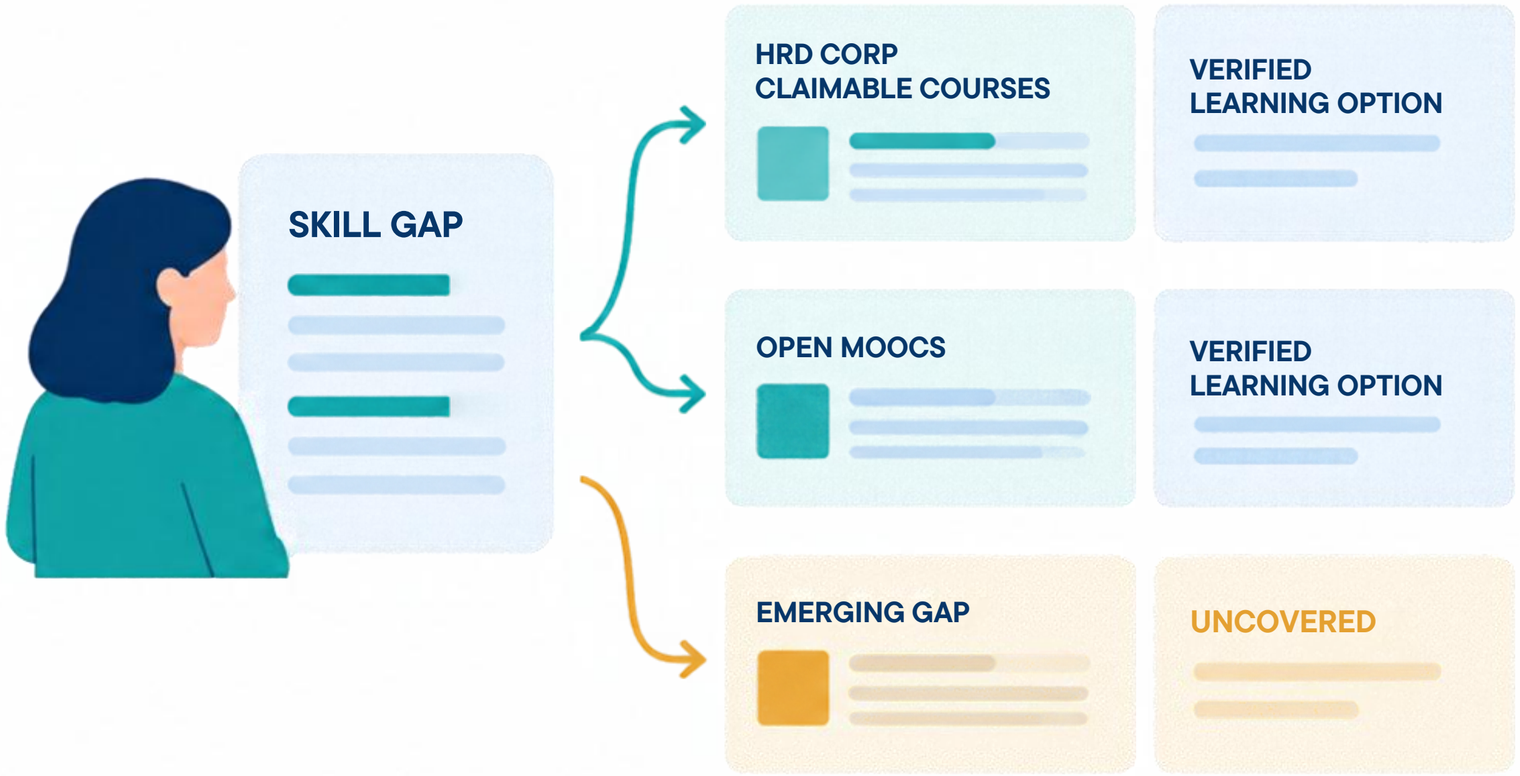

Autonomous-agent workflow displacement

Trend data are modeled estimates, not crystal-ball predictions.

10–45%

Grounded pathways—and an honest ‘Uncovered’ status

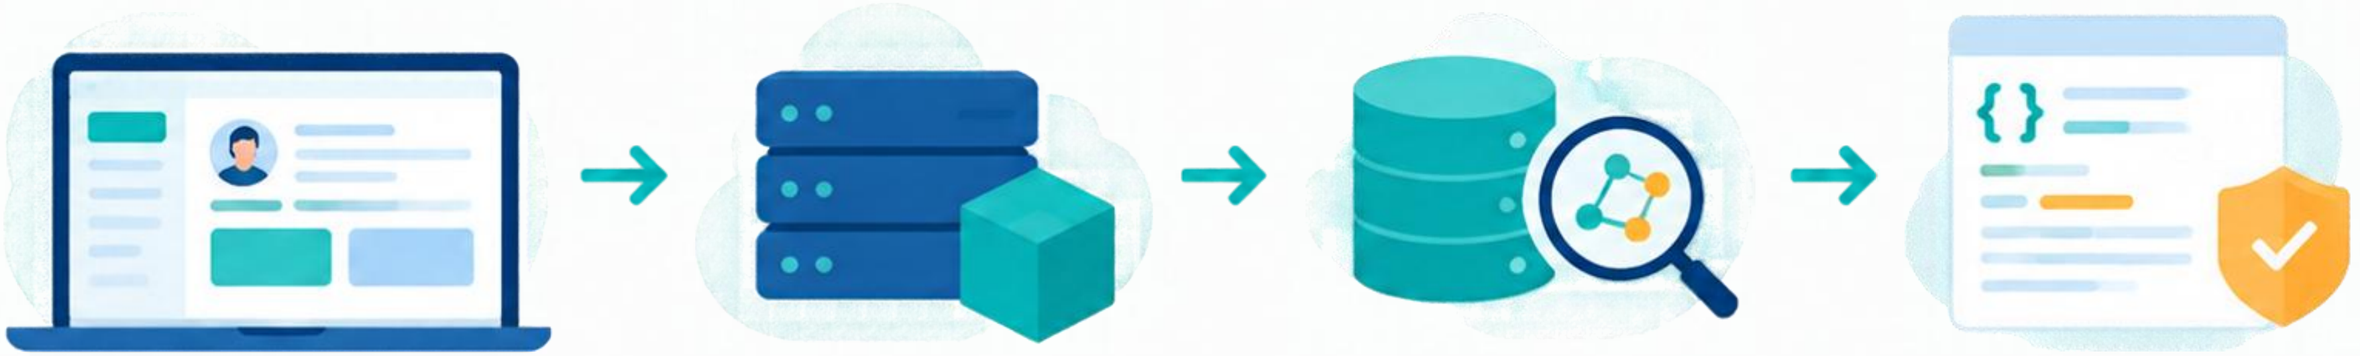

Match skill gaps to verified HRD Corp claimable courses and open MOOCs.

Show course evidence rather than inventing credentials or providers.

Mark emerging gaps ‘Uncovered’ when no accredited course is verified.

Measure progress against learning and work outcomes

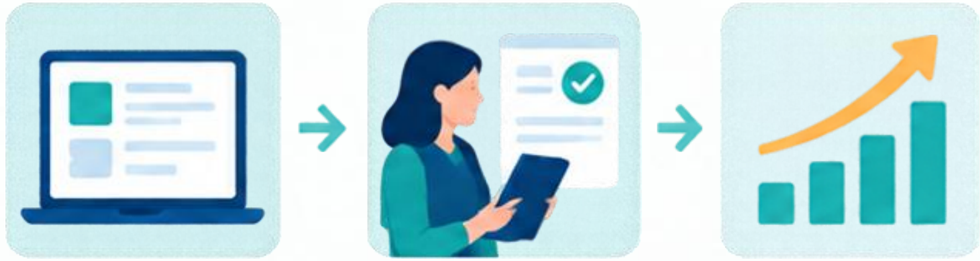

SDG 4.4 · Quality Education: target practical future-skill development.

SDG 8.2 · Decent Work: target productivity through innovation and skills.

Phase 2: deployment roadmap

Set pilot measures, validate outcomes, then expand responsibly.

SET PILOT MEASURES

VALIDATE OUTCOMES

Career navigation should show its work.

AI Workforce Pathon turns evidence into grounded next steps.

Support our Phase 2 deployment.
